

Los Angeles SkyWatch presents:
Elana Freeland

“Geoengineering and the Space Fence Lockdown”
Saturday, March 23rd @ 1pm

Elana Freeland will be discussing her understanding of the Lockheed Martin-run Space Fence, whose official description is that of a few devices tracking space debris and perhaps some radar projects. Her contention is that the Space Fence is actually far more significant, entailing control and surveillance reaching all the way into our nervous systems via a geoengineered delivery system that includes our now-ionized atmosphere.

Freeland believes the Space Fence and its ongoing use of geoengineering (which includes chemtrails) is run entirely by Military-Industrial-Intelligence Complex using *black programs*. All are designed to help create an elaborate *electromagnetic infrastructure* on the ground and in near-Earth orbit using satellites, nanotechnology, radar installations, particle accelerators like CERN, 3-6G cell phones, fiber optics, Smart Grid devices, public utilities, NexRads, WSACs, the Internet of Things--and more. The point of this Space Fence infrastructure is *full spectrum dominance* of the planet, including all its life forms, using electromagnetism and nanotechnology.

The Space Fence is meant to facilitate a number of key operations: weather engineering, planetary geophysical control, directed energy warfare, comprehensive surveillance, biological manipulation, and the detection of exotic propulsion technologies. The Space Fence is already up and running. It only awaits the 5G linchpin for total societal control. This may sound like science fiction at first hearing, but to Freeland, the Space Fence is the most serious threat of our time.

Elana Freeland is a writer, speaker and teacher best known for her books “Chemtrails, HAARP, and the Full Spectrum Dominance of Planet Earth” (2014) and “Under An Ionized Sky: From Chemtrails to Space Fence Lockdown” (2018). Elana has also written a 4-book fictional series called “Sub Rosa America: A Deep State History” about the hidden history of America since President Kennedy's assassination.

UnUrban Coffee House
3301 Pico Blvd., Santa Monica, CA 90405
Free admission, donations welcome
